

TI reports first quarter 2020 financial results and shareholder returns

Conference call on TI website at 3:30 p.m. Central time today www.ti.com/ir

DALLAS, April 21, 2020 /PRNewswire/ -- Texas Instruments Incorporated (TI) (Nasdaq: TXN) today reported first quarter revenue of \$3.33 billion, net income of \$1.17 billion and earnings per share of \$1.24. Earnings per share include a 10-cent benefit for items that were not in the company's original quidance.

Regarding the company's performance and returns to shareholders, Rich Templeton, Tl's chairman, president and CEO, made the following comments:

- "Revenue decreased 7% from the same quarter a year ago.
- "In our core businesses, Analog revenue declined 2% and Embedded Processing declined 18% from the same quarter a year ago.
- "Our cash flow from operations of \$6.4 billion for the trailing 12 months again underscored the strength of our business model. Free cash flow for the same period was \$5.6 billion and 40% of revenue. This reflects the quality of our product portfolio, as well as the efficiency of our manufacturing strategy, including the benefit of 300-millimeter Analog production.
- "We have returned \$6.6 billion to owners in the past 12 months through stock repurchases and dividends. Over the same period, our dividends represented 55% of free cash flow, underscoring their sustainability. Together, our stock repurchases and dividends reflect our continued commitment to return all free cash flow to our owners.
- "With a COVID-19 recession likely upon us, and with reduced visibility of customer demand, we are using the 2008 financial crisis to model our second quarter outlook. To reflect the increased uncertainty, we have expanded the range of our guidance. Therefore, TI's second quarter outlook is for revenue in the range of \$2.61 billion to \$3.19 billion, and earnings per share between \$0.64 and \$1.04, which includes an estimated \$10 million discrete tax benefit. We expect our annual operating tax rate to be about 14% in 2020."

Free cash flow, a non-GAAP financial measure, is cash flow from operations less capital expenditures.

^{*} Includes acquisition charges.

Compared with the year-ago quarter:

Analog: (includes Power, Signal Chain and High Volume)

- Revenue decreased in Signal Chain and High Volume, offset by growth in Power.
- Operating profit decreased primarily due to lower revenue and associated gross profit.

Embedded Processing: (includes Connected Microcontrollers and Processors)

- Revenue decreased in both product lines.
- Operating profit decreased due to lower revenue and associated gross profit.

Other: (includes DLP[®] products, calculators and custom ASIC products)

• Revenue decreased \$64 million, and operating profit decreased \$5 million.

Non-GAAP financial information

This release includes references to free cash flow and ratios based on that measure. These are financial measures that were not prepared in accordance with GAAP. Free cash flow was calculated by subtracting capital expenditures from the most directly comparable GAAP measure, cash flows from operating activities (also referred to as cash flow from operations).

We believe that free cash flow and the associated ratios provide insight into our liquidity, our cash-generating capability and the amount of cash potentially available to return to shareholders, as well as insight into our financial performance. These non-GAAP measures are supplemental to the comparable GAAP measures.

Reconciliation to the most directly comparable GAAP measures is provided in the table below.

Amounts are in millions of dollars.

	F			
		2020	2019	Change
Cash flow from operations (GAAP)	\$	6,393\$	7,184	1 (11)%
Capital expenditures		(757)	(1,193)
Free cash flow (non-GAAP)	\$	5,636\$	5,99	(6)%
Revenue	\$	14,118 \$	15,589	-

This release also includes references to an annual operating tax rate, a non-GAAP term we use to describe the estimated annual effective tax rate, a GAAP measure that by definition does not include discrete tax items. We believe the term annual operating tax rate helps differentiate from the effective tax rate, which includes discrete tax items.

Notice regarding forward-looking statements

This release includes forward-looking statements intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally can be identified by phrases such as TI or its management "believes," "expects," "anticipates," "foresees," "forecasts," "estimates" or other words or phrases of similar import. Similarly, statements herein that describe TI's business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. All such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those in forward-looking statements.

We urge you to carefully consider the following important factors that could cause actual results to differ materially from the expectations of TI or our management:

- The duration and scope of the COVID-19 pandemic, government and other third-party responses to it and the
 consequences for the global economy, including to our business and the businesses of our suppliers, customers and
 distributors;
- Economic, social and political conditions, and natural events in the countries in which we, our customers or our suppliers
 operate, including global trade policies;
- Market demand for semiconductors, particularly in the industrial and automotive markets, and customer demand that differs from forecasts:
- Our ability to compete in products and prices in an intensely competitive industry;
- Evolving cybersecurity and other threats relating to our information technology systems or those of our customers or suppliers;
- Our ability to successfully implement and realize opportunities from strategic, business and organizational changes, or our ability to realize our expectations regarding the amount and timing of restructuring charges and associated cost savings;
- Our ability to develop, manufacture and market innovative products in a rapidly changing technological environment, and our timely implementation of new manufacturing technologies and installation of manufacturing equipment;
- Availability and cost of raw materials, utilities, manufacturing equipment, third-party manufacturing services and manufacturing technology;
- Product liability, warranty or other claims relating to our products, manufacturing, delivery, services, design or communications, or recalls by our customers for a product containing one of our parts;
- Compliance with or changes in the complex laws, rules and regulations to which we are or may become subject, or actions
 of enforcement authorities, that restrict our ability to operate our business, or subject us to fines, penalties or other legal
 liability;
- Changes in tax law and accounting standards that impact the tax rate applicable to us, the jurisdictions in which profits are determined to be earned and taxed, adverse resolution of tax audits, increases in tariff rates, and the ability to realize deferred tax assets:
- A loss suffered by one of our customers or distributors with respect to TI-consigned inventory;
- Financial difficulties of our distributors or their promotion of competing product lines to our detriment; or disputes with significant distributors;
- Losses or curtailments of purchases from key customers or the timing and amount of distributor and other customer inventory adjustments;
- Our ability to maintain or improve profit margins, including our ability to utilize our manufacturing facilities at sufficient levels to cover our fixed operating costs, in an intensely competitive and cyclical industry and changing regulatory environment;
- Our ability to maintain and enforce a strong intellectual property portfolio and maintain freedom of operation in all
 jurisdictions where we conduct business; or our exposure to infringement claims;
- Instability in the global credit and financial markets;
- Increases in health care and pension benefit costs:
- Our ability to recruit and retain skilled personnel, and effectively manage key employee succession; and
- Impairments of our non-financial assets.

For a more detailed discussion of these factors, see the Risk factors discussion in Item 1A of Tl's most recent Form 10-K. The forward-looking statements included in this release are made only as of the date of this release, and we undertake no obligation to update the forward-looking statements to reflect subsequent events or circumstances. If we do update any forward-looking statement, you should not infer that we will make additional updates with respect to that statement or any other forward-looking statement.

About Texas Instruments

From connected cars and intelligent homes to self-monitoring health devices and automated factories, Texas Instruments Incorporated (TI) (Nasdaq: TXN) products are at work in virtually every type of electronic system. With operations in more than 30 countries, we engineer, manufacture, test and sell analog and embedded semiconductor chips. Our employees, about 30,000 worldwide, are driven by core values of integrity, innovation and commitment, and work every day to shape the future of technology. Learn more at www.ti.com.
